灰色花岗岩铺地, 澳大利亚硬木甲板, 白水泥混合水泥, 白色水磨石碗, 黑色玻璃砖, 黑色或白色陶瓷, 蓝色玻璃砖

植物配置

龙舌兰、秋水仙、苏铁、棕竹、椰子、绿萝

This swimming pool was designed to be the main feature of the backyard and was to be completely visible from the house for when the owner's children can swim by themselves. With the pool being visible from all main living areas of the house it needed to be interesting and aesthetically pleasing. Even though there was to be substantial excavation to the rear portion of the site, designers kept the pool level with the entertaining area to make the entire space flow seamlessly. This meant there was to be high retaining walls along the pool side boundary and the rear boundary. Designers utilized these walls to create three stainless steel waterfalls which pour over a stone clad wall rising out of the pool and into the water below. This added both visual interest and sound to the environment.

A small poolside lounge pavilion was also created that houses a bathroom and outdoor shower so the owners and their guests don't have far to go. This is such an inviting pool. It looks fantastic from inside the house and draws you out into the alfresco area and garden. The pool is such an integral part of the entertaining area acting as a large water feature that is stunning to look at and admire whilst enjoying outdoor dining.

泳池是这个房子的主要设计。从屋内可以完全看到泳池。因此屋主放心孩子单独游泳。也正因为从屋内主要的活动区都能看到泳池, 这泳池必须设计得美观且有趣。虽然建造池需要挖掉大量松软的土壤, 但是设计师把泳池建在和娱乐区的同一水平面上, 让整个区域过渡自然。而这意味着要建起土墙, 借助土墙, 设计师建造了三个不锈钢跌水口, 水从泳池上方的石建跌水池, 这为整个院子增加了视觉和听觉的乐趣。

水景旁的休息区得有一个露天淋浴间, 因此屋主和客人不需走远路去淋浴。这是一个多么有魅力的泳池: 从屋内看, 它形态美妙, 把人吸引到户外去; 在屋外就餐时, 它美妙的景色又时刻吸引着屋主的目光。
